

New Roughness

# WARP<sub>surf</sub>

The revolution of the world roughness starts here.

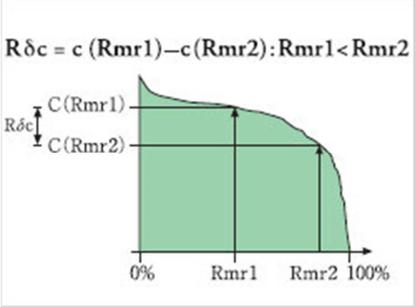

FUNCTION	DESCRIPTION	IMAGE
<b>Display:</b>	7 inches (18 cm) 16 million color touch screen  Win Mobile interface style (a square)	
<b>Field measure:</b>	X = 60 mm Z = 1500 um (roughness probe) Z = 3000 um (profilometry probe)	
<b>Resolution:</b>	0,1 nm (0,0001 μm) su 1500 um	
<b>Micrometer:</b>	Height of reachable extent compared to the support surface by -10 Mm to 110 mm with the fine provided.	
<b>Probe:</b>	Interchangeable blades	

<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Roughness:</b></p>	<p>75 roughness parameters</p> <p><u>ISO 4287-1997:</u>  Ra–Rq–Rt–Rz–Rp–Rv–Rc–  Pa–Pq–Pt–Pq–Pv–Pc–PSm–  Wa–Wq–Wt–Wz–Wp–Wv–  Rk–Rpk–Rvk–Mr1– Mr2–</p> <p><u>ISO 12085:</u>  Pt – R – AR – Rx – Wte –</p> <p><u>DIN 4768:</u>  Rmax</p> <p><u>VDA2007:</u>  WDSm- WDC - WDt</p>	  
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Profile analysis:</b></p>	<p>CAD integrated for the analysis of the profile.  Full functions: lines - points - bows - size</p>	
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Archive:</b></p>	<ul style="list-style-type: none"> <li>- Automatic saving of the last 6 measures</li> <li>- Saving up to 1000 measurements (more graphics parameters)</li> </ul>	

<p><b>Connectivity:</b></p>	<p>1 USB Type A port (connection to USB pens)</p> <p>1 USB Type B port (connection to PC)</p> <p>Bluetooth connection to the printer PR10</p>	
<p><b>Printer, the possibility of connect:</b></p>	<p>Commercial desktop printer via USB</p> <p>PR10 printer via Bluetooth</p> <p>direct PDF creation on a USB stick</p>	<p>Uscita predefinita</p>  

## New smart functions:

<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Screenshot</b></p>	<p>Pressing the "picture machine" the image on the display is saved to the USB stick. Very useful for exporting images to then be attached to Word documents, Excel or send via Email</p>																																																																									
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>Support of the parameters</b></p>	<p>On the screen of results by clicking on the parameter appears a brief explanation of the parameter according to the legislation that identifies it.</p>	<p><math>R\delta c = c(Rmr1) - c(Rmr2) : Rmr1 &lt; Rmr2</math></p> 																																																																								
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>by protection over range</b></p>	<p>Bringing the probe into top home run with a manual movement (typical, positioning itself on the particular measurement) the instrument emits a warning tone and display an error message, thus preventing breakage of the probe</p>																																																																									
<p style="writing-mode: vertical-rl; transform: rotate(180deg);"><b>self-determining length cut-off</b></p>	<p>By pressing a button the instrument runs a series of measures on the particular area being examined by proposing at the end the best measuring conditions according to ISO 4288</p>	<p><b>Condizioni di misura: parametri R</b> ISO4288: '98</p> <table border="1"> <thead> <tr> <th colspan="4">Profilo non periodico</th> <th colspan="2">Profilo periodico or RSm</th> <th colspan="2">Condizioni di misura</th> </tr> <tr> <th colspan="2">Ra, Rq, Rsk, Rku or Rkq</th> <th colspan="2">Rz, Rv, Rp, Rc, or Rt</th> <th colspan="2"></th> <th>Lunghezza di campionamento</th> <th>Lunghezza di valutazione</th> </tr> <tr> <th colspan="2">Ra (µm)</th> <th colspan="2">Rz (µm)</th> <th colspan="2">RSm (mm)</th> <th>λr = CutOff</th> <th>λn (mm) = S × λr</th> </tr> <tr> <th>Più di&gt;</th> <th>Meno di&lt;</th> <th>Più di&gt;</th> <th>Meno di&lt;</th> <th>Più di&gt;</th> <th>Meno di&lt;</th> <th>Ac (mm)</th> <th></th> </tr> </thead> <tbody> <tr> <td>0.006</td> <td>0.02</td> <td>0.025</td> <td>0.1</td> <td>0.013</td> <td>0.04</td> <td>0.08</td> <td>0.4</td> </tr> <tr> <td>0.02</td> <td>0.1</td> <td>0.1</td> <td>0.5</td> <td>0.04</td> <td>0.13</td> <td>0.25</td> <td>1.25</td> </tr> <tr> <td>0.1</td> <td>2</td> <td>0.5</td> <td>10</td> <td>0.13</td> <td>0.4</td> <td>0.8</td> <td>4</td> </tr> <tr> <td>2</td> <td>10</td> <td>10</td> <td>50</td> <td>0.4</td> <td>1.3</td> <td>2.5</td> <td>12.5</td> </tr> <tr> <td>10</td> <td>80</td> <td>50</td> <td>200</td> <td>1.3</td> <td>4</td> <td>8</td> <td>40</td> </tr> </tbody> </table>	Profilo non periodico				Profilo periodico or RSm		Condizioni di misura		Ra, Rq, Rsk, Rku or Rkq		Rz, Rv, Rp, Rc, or Rt				Lunghezza di campionamento	Lunghezza di valutazione	Ra (µm)		Rz (µm)		RSm (mm)		λr = CutOff	λn (mm) = S × λr	Più di>	Meno di<	Più di>	Meno di<	Più di>	Meno di<	Ac (mm)		0.006	0.02	0.025	0.1	0.013	0.04	0.08	0.4	0.02	0.1	0.1	0.5	0.04	0.13	0.25	1.25	0.1	2	0.5	10	0.13	0.4	0.8	4	2	10	10	50	0.4	1.3	2.5	12.5	10	80	50	200	1.3	4	8	40
